

Website Name:

Dreams. BIG, small, Waking and Sleeping

Description:

A widespread dive into the concept of dreams, be it lucid dreaming, REM cycles, real life dreams that either many people have, or hardly anyone has. The textbook definition versus what people usually lean toward when thinking of their dreams. Unattainable dreams, the pursuit of them, and the leaving of them by the wayside in exchange for stability. What life is when you don't hold a dream close to your person, and what it truly means to reach for the stars. I would also like to have a page where people can input a dream they may or may not have and see if other people share the same dream.

Pages:

Waking Dreams

Slumber and Dreaming

Dreams vs. Goals

A Lack of Dreams

About Me

Dreamboard (optional)
